Gladiola - panel (10 testów)

Opis produktu

Gladiola

Key warning symptoms:

1. Mottle or mosaic
2. Streak
3. Flower breaking

Cucumber mosaic virus, which we detect often in gladiolus samples, causes white break mosaic. This disease can cause flowers to be blotchy and open slowly. Cucumber mosaic virus is spread by aphids.

Mild mosaic, a gladiolus disease with symptoms that can include faint mottled patterns on leaves and flower stems, is caused by bean yellow mosaic virus, an aphid-transmitted member of the potyvirus group. We find viruses of this group frequently in gladiolus samples.

Gladiolus Screen (10 tests)

Pathogen	Symbol
Arabis mosaic virus	ArMV
Cucumber mosaic virus	CMV
Impatiens necrotic spot virus	INSV
Potyvirus group test	POTY
Strawberry latent ringspot virus	SLRSV
Tobacco mosaic virus	TMV
Tobacco rattle virus	TRV
Tobacco ringspot virus	TRSV
Tomato ringspot virus	ToRSV
Tomato spotted wilt virus	TSWV
