Opis produktu

HumPCR? STREPTOCOCCUS (96D)

Streptococcus sp. is a genus of spherical Gram-positive bacteria. In addition to streptococcal pharyngitis (strep throat), certain Streptococcus species are responsible for many cases of pink eye, endocarditis, erysipelas, meningitis, bacterial pneumonia, and necrotizing fasciitis. However, many streptococcal species are nonpathogenic, and form part of the commensal human microbiota. HumPCR? STREPTOCOCCUS Detection Kit is the direct detection of Streptococcus sp. on the basis of a genetic database, so it can diagnose very fast and accurately. It can amplify only speci?c gene using the PCR (Polymerase Chain Reaction) method, and take only 3 hours for detection. Therefore, it is a very fast, accurate and reliable technique.
