Opis produktu

Apyrogenic, nonallergic, and low-toxicity immunostimulator with great potential for diagnostic, immunotherapeutic, and prophylactic applications in diseases such as hepatitis C and cancers. MDP-C has been synthesized as a non-specific immunomodulator. It induces strong cytolytic activity by macrophages on P388 leukemia cells and cytotoxic activity by cytotoxic T lymphocytes (CTLs) on P815 mastocytoma cells.

Sequence: Ac-?-benzyl-muramyl-Ala-D-Glu(Lys(trans-(3-nitrocinnamoyl))-NH₂)-NH₂

Formula: C₄₁H₅₆N₈O₁₄

CAS: 863918-60-9

MW: 884,94
