## Petunia - panel (17 testów)

### Opis produktu

#### **Petunia**

#### **Key warning symptoms:**

- Brown spots
- Mosaic
- Deformation
- Chlorosis
- Mottle
- Ringspots
- Stunting

Petunias are vulnerable to a large number of viruses. The single virus we detect most often in petunias, tobacco mosaic virus, can cause crinkled leaves, yellow and green mosaic, and stunting. The virus can remain infectious for a long time in soil and on tools and other surfaces. People can transmit Tobacco mosaic virus and Tomato mosaic virus readily by working with plants. Both unburned and burned tobacco products can be a source of infection.

#### **Petunia Screen (17 tests)**

| Pathogen                       | Symbol |
|--------------------------------|--------|
| Alfalfa mosaic virus           | AMV    |
| Apple mosaic virus             | ApMV   |
| Arabidopsis mosaic virus       | ArMV   |
|                                | CbMV   |
| Calibrachoa mottle virus       |        |
| Chrysanthemum virus B          | CVB    |
| Cucumber mosaic virus          | CMV    |
| Impatiens necrotic spot virus  | INSV   |
| Potyvirus group test           | POTY   |
| Prunus necrotic ringspot virus | PNRSV  |
| Tobacco etch virus             | TEV    |
| Tobacco mosaic virus           | TMV    |
| Tobacco ringspot virus         | TRSV   |
| Tobacco streak virus           | TSV    |
| Tomato aspermy virus           | TAV    |
| Tomato mosaic virus            | ToMV   |
| Tomato ringspot virus          | ToRSV  |
| Tomato spotted wilt virus      | TSWV   |

**Other tests available for petunia are:**

| Pathogen                         | Symbol   |
|----------------------------------|----------|
| Alstroemeria mosaic virus        | AIMV     |
| American plum line pattern virus | APLPV    |
| Beet western yellows virus       | BWYV     |
| Broad bean wilt virus-1,2        | BBWV-1,2 |
| Kyuri green mottle mosaic virus  | KGMMV    |
| Peanut stunt virus               | PSV      |
| Potato acuba mosaic virus        | PAMV     |
| Potato leafroll virus            | PLRV     |
| Potato virus A                   | PVA      |
| Potato virus X                   | PVX      |
| Potato virus Y                   | PVY      |
| Potato spindle tuber viroid      | PSTVd    |
| Soybean mosaic virus             | SMV      |
| Tobacco rattle virus             | TRV      |
| Tomato bushy stunt virus         | TBSV     |

---

|                                    |        |
|------------------------------------|--------|
| Turnip mosaic virus                | TuMV   |
| Begomovirus group test             | Begomo |
| Curtovirus/Becurtovirus group test | Curto  |
| Carlavirus group test              | Carla  |
| Luteoviridae group test            | Luteo  |
| Nepovirus group test               | Nepo   |
| Phytoplasmas                       | Phyto  |
| Pospiviroid group test             | Pospi  |
| Potexvirus group test              | Potex  |
| Potyvirus group test               | Poty   |
| Tobamovirus group test             | Tobamo |
