VetPCR? C.fetus (96D)

Numer katalogowy

VET-B029-96D

Opis produktu

C. fetus subsp. fetus/venerealis PCR Detection Kit
Bovine genital campylobacteriosis is a venereal disease also known as bovine venereal
campylobacteriosis. The causal agent of this sexually transmissible disease is
Campylobacter fetus subsp. venerealis. The species is divided into two closely
related subspecies: C. fetus subsp. venerealis and C. fetus subsp. fetus. By definition C.
fetus subsp. venerealis is associated with bovine genital campylobacteriosis, causing
fertility problems with considerable economic losses, particularly in endemic regions.
Bovine infections with C. fetus subsp. fetus are associated with abortion and have a more
sporadic occurrence.

VetPCR? C.fetus Detection Kit is the direct detection of C. fetus subsp. fetus/venerealis on the basis of a genetic database, so it can diagnose very fast and accurately. It can amplify only specific gene using the PCR (Polymerase Chain Reaction) method, and take only 3 hours for detection. Therefore, it is a very fast, accurate, reliable technique.

Characteristics

Ready to use: only DNA template and D.W. are needed. Easy and speed protocol. Stable for 1 year at -20?C. Time-saving and cost-effective.

Contents

| Outletits | | | |
|-------------------------------|----------------|----------------|---------|
| Kit | Quantity 48 | Quantity 96 | Package |
| VetPCR™ C.fetus Premixture | 1 | 1 | Vial |
| PCR Internal Control | 1 | 1 | Vial |
| DNase/RNase free water | 1 | 1 | Vial |
| C.fetus PCR Positive control | 1 | 1 | Vial |
| PCR Negative control | 1 | 1 | Vial |
| Mineral Oil Solution | 1 | 1 | Vial |
| Brig™ Molecular Weight marker | 1 | 1 | Vial |
| DNA purification kit | 50 | 100 | Test |

Interpretation of the Test Result

Expected PCR product size: 398bp
