# VetPCR? P. salmonis (48D)

Numer katalogowy

VET-P006-48D

## Opis produktu

**Piscirickettsia salmonis PCR Detection Kit** Piscirickettsia salmonis is a gram-negative obligate intracellular bacterium that causes systemic septicaemia (salmonid rickettsial syndrome, SRS, or piscirickettsiosis) in salmonid fish Piscirickettsia-

septicaemia (salmonid rickettsial syndrome, SRS, or piscirickettsiosis) in salmonid fish Piscirickettsialike bacteria are now been recognized with increasing frequency in a variety of other fish species, from both fresh and salt waters around the world. Piscirickettsiosis and piscirickettsiosis-like diseases have affected aquaculture productivity, profitability, the species compatible with commercial rearing, and transportation of fish from site to site.

VetPCR? P.salmonis Detection Kit is the direct detection of Piscirickettsia salmonis on the basis of a genetic database, so it can diagnose very fast and accurately. It can amplify only specific gene using the PCR (Polymerase Chain Reaction) method, and take only 3 hours for detection. Therefore, it is a very fast, accurate and reliable technique.

#### Characteristics

Ready to use : only DNA template and D.W. are needed. Easy and speed protocol. Stable for 1 year at -20?C. Time-saving and cost-effective.

#### Contents

| Kit                                       | Quantity<br>48 | Quantity<br>96 | Package |
|---|----------------|----------------|---------|
| VetPCR™ P.salmonis Premixture             | 1              | 1              | Vial    |
| PCR Internal Control                      | 1              | 1              | Vial    |
| DNase/RNase free water                    | 1              | 1              | Vial    |
| P.salmonis PCR Positive control           | 1              | 1              | Vial    |
| PCR Negative control                      | 1              | 1              | Vial    |
| Mineral Oil Solution                      | 1              | 1              | Vial    |
| Brig <sup>™</sup> Molecular Weight marker | 1              | 1              | Vial    |
| DNA purification kit                      | 50             | 100            | Test    |

### Interpretation of the Test Result

Expected PCR product size : 325bp
