MK100-4A

Opis produktu

Microplate Incubator MK100-4A

Specification

The MK100-4A is a high performance microplate incubator which accommodates up to four microplates. The MK100-4A can be used for any enzyme or cell-based assays requiring uniform and strictly controlled incubation up to 70 °C.

Incubation	Incubation range from 8 °C above ambient to 70 °C
	0.1 °C steps
	Temperature stability ± 0.3 °C
	Temperature gradient < 0.5 °C across the plate (@37 °C)
Warming Up Speed	< 25 min (from 20 °C to 70 °C)
Capacity	Up to 4 microplates
	Max. microplate dimensions:
	Width: 8.9 cm, Length: 13.3 cm, Height: 4.8 cm
Power Requirements	115/230 V, 60/50 Hz, max. 90 VA
Dimensions	320 × 350 × 185 mm (W x D x H)
	Weight: 7 kg

Key features

- Microprocessor controlled time and temperature
- Beep-signal and stop of after program completion
- Heating plates above and below the microplates
- Excellent temperature accuracy and uniformity across the plate
- User definable parameters - temperature and time
- Platform capacity: 4 microtest plate
